- She is a very helpful TA. You can ask her questions and she will give a definite answer.
- At times she was difficult to understand, she does have an accent, but speaks english well. She was very easy to approach, but sometimes when asked a question she fixed the problem on her own, rather than explaining it and letting us do it ourselves.
- Jin Sun is an effective TA for cs8 lab. she is always there when you need help, and she clearly helps you understand the necessary steps to take. She gives students the chance to make up lab, and is never harsh on them about it. Jin Sun could probably help the students understand the basics of html, and could give the students advice on any problems that we might encounter.
- She was very helpful through out the whole course. She always had a nice smile on her face that encouraged students to ask her questions comfortably. When I was really sick, she gave me a chance to make up the labs, and she was extra nice. She is a very caring person.
